## B. Fees

Fee should be calculated using the following process & worksheet. **Please see Instructions before filling out worksheet.**

**Step 1/Type of Activity:** Describe each type of activity that will occur in wetland resource area and buffer zone.

**Step 2/Number of Activities:** Identify the number of each type of activity.

**Step 3/Individual Activity Fee:** Identify each activity fee from the six project categories listed in the instructions.

**Step 4/Subtotal Activity Fee:** Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

**Step 5/Total Project Fee:** Determine the total project fee by adding the subtotal amounts from Step 4.

**Step 6/Fee Payments:** To calculate the state share of the fee, divide the total fee in half and subtract \$12.50. To calculate the city/town share of the fee, divide the total fee in half and add \$12.50.

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

Dear Mr. Petrozzi,

The Natural Heritage & Endangered Species Program of the Massachusetts Division of Fisheries & Wildlife (the "Division") received your request for a pre-filing consultation for the above-noted parcels relative to the Massachusetts Endangered Species Act (M.G.L. c. 131A) and its implementing regulations (MESA; 321 CMR 10.00). The pre-filing information submitted to the Division includes a conceptual plan entitled PRELIMINARY Open Space Plan (April 9, 2024, no revisions; sheet 1 of 1; prepared by Allen Engineering & Associates, Inc. of Hopedale, MA; Attached) (the "Open Space Plan"). The project site is mapped as *Priority Habitat* for the Eastern Box Turtle (*Terrapene carolina*), a species state-listed as "Special Concern" pursuant to the MESA.

The project as shown on the Open Space Plan includes development of approximately ±116-acres of the ±214-acre Property (see properties/parcels under Location) by the Proponent. The development of the Property includes a residential development, access roads and associated drives, grading, utilities, snow storage and stormwater management basins and structures (the "Project"). The Project will result in a permanent loss of ±98-acres of Eastern Box Turtle habitat based upon the submitted pre-filing information and calculations, and further described in the May 3, 2024 email from Misty-Anne Marold (Division). Preliminarily, and in advance of a formal MESA determination, we anticipate that the Project will require a Conservation and Management Permit (321 CMR 10.23; "CMP") to proceed. However, in order for the Division to make a formal MESA determination, a formal filing and filing fee is required pursuant to 321 CMR 10.18<sup>1</sup>. Projects that result in a Take of state-listed species must apply and qualify for a CMP, which would require the submission of a CMP Application and its associated fee<sup>2</sup>.

<sup>1</sup> <https://www.mass.gov/how-to/how-to-file-for-a-mesa-project-review>

<sup>2</sup> <https://www.mass.gov/info-details/mesa-conservation-management-permit-overview>

**MASSWILDLIFE**

To be eligible for a CMP, the applicant must demonstrate that the project, as proposed, has avoided, minimized and mitigated impacts to State-listed Species consistent with the following performance standards (321 CMR 10.23(2):

- (a) The applicant has adequately assessed alternatives to both temporary and permanent impacts to State-listed Species;
- (b) An insignificant portion of the local population would be impacted by the project or activity; and
- (c) The applicant agrees to carry out a conservation and management plan that provides a long-term Net Benefit to the conservation of the state-listed species impacted.

The Proponent has worked cooperatively with the Division to proactively address impacts to state-listed species relative to the proposed Project, including reducing the total area of disturbance and reconfiguring project design to maintain habitat continuity with existing protected lands to the west and through the site. Conceptually, it is our understanding that the Proponent proposes to meet the requirements of 321 CMR 10.23 with, but not limited to, the following elements:

- 1) Permanently protect approximately ±98-acres of onsite habitat through a Division-approved Conservation Restriction ("CR") pursuant to Sections 31-33 of Chapter 184, or as otherwise allowed by the Division in a configuration substantially like that shown on the Open Space Plan. The CR would be held by any entity deemed qualified by the Executive Office of Energy and Environmental Affairs-Division of Conservation Services. The boundaries of the CR would include Division-approved monumentation and signage. As presently proposed, the proposed Open Space includes stormwater structures, construction of which would be a loss of habitat for Eastern Box Turtle and inclusion of these structures does not provide habitat for the purpose of meeting long-term Net Benefit pursuant to 321 CMR 10.23.<sup>3</sup>
- 2) Manage the Open Space and create nesting habitats to improve and expand habitat quality for state-listed turtles pursuant to a habitat management plan developed by the Proponent in consultation with the Division. Long-term management of successional habitats typically requires periodic mowing to maintain an "old field" type of habitat. Long-term management of nesting habitats may include soil scarification, sand importation, invasive plant control and the like to maintain open sandy soils with patches of suitable native vegetation cover.
- 3) Establish a funding mechanism, either via an initial endowment or regular allocation of fees from a Homeowners Association (or similar), to ensure that long-term habitat management continues in perpetuity. The funding mechanism and associated funding amount shall be mutually agreed upon by the Proponent and the Division.
- 4) Install permanent turtle-barriers to physically demarcate the Open Space boundary and prevent turtles from entering developed portions of the property. The type, size, and location of the permanent barriers shall be mutually agreed upon by the Proponent and the Division.
- 5) Incorporate wingwalls or similar along the central section of the development to direct turtles off the roadway and through the culverted crossings. The type, size, and location of the turtle direction and passage devices shall be mutually agreed upon by the Proponent and the Division.
- 6) Exclude vertical curbs on roadways. If curbing is required, the Project will use Type D curbs, cape-cod berms or similar to allow for turtles to safely traverse into and escape Project roadways. Curbing design

<sup>3</sup> Information about CRs can be found on the EEA website (<https://www.mass.gov/info-details/conservation-restriction-review-program>). Please obtain the CR template from the Division, as we require the use of a modified version.

and placement shall be mutually agreed upon by the Proponent, after consultation with the municipality, and the Division.

- 7) Include traffic calming measures, signage, and other measures to reduce road speeds. Such measures and devices and their placement shall be agreed upon by the Proponent, after consultation with the municipality, and the Division.
- 8) Use native plant species for all areas not maintained as lawn. Exclude all prohibited or invasive plant species from landscaping plans.
- 9) Implement a Division-approved turtle protection plan.

The Division anticipates that the Project can qualify for a CMP, provided the Project's MESA CMP Application includes the components outlined above and the final Project's impact calculations are substantially similar to those outlined by this pre-filing consultation letter and May 3, 2024 email from Misty-Anne Marold (Division) to the Proponent. The Division encourages the Proponent to continue examining opportunities to further avoid and minimize impacts to state-listed species and their habitat as the Project moves into the design phase.

The Property Owners and the Proponent have the right to conduct Eastern Box Turtle surveys and or associated investigations pursuant to Division-approved protocol(s) implemented by Division-approved biologist(s). The results of all surveys or any other field efforts relative to Eastern Box Turtles shall be submitted to the Division, in writing, and will be incorporated into the Division's review of this project subject to 321 CMR 10.18 and, if applicable, 321 CMR 10.23. The Division understands that the Property Owners reserve their rights under 321 CMR 10.12(8).

This letter constitutes pre-filing guidance and does **not** impose obligations upon any party, including the Proponent or Property Owners. This letter does not authorize any work or activities not otherwise exempt pursuant to 321 CMR 10.14. Prior to initiation of any work or activities on the Property, the parties are subject to all MESA filing and review requirements (321 CMR 10.18) and compliance with any final MESA determination (321 CMR 10.18, 10.23). In addition, any non-exempt work or activities proposed on the Property must be consistent with the anti-segmentation provisions of the MESA (321 CMR 10.16).

Please do not hesitate to contact Misty-Anne R. Marold, Senior Endangered Species Review Biologist, at (508) 389-6356 (misty-anne.marold@mass.gov) if you have any questions.

Sincerely,

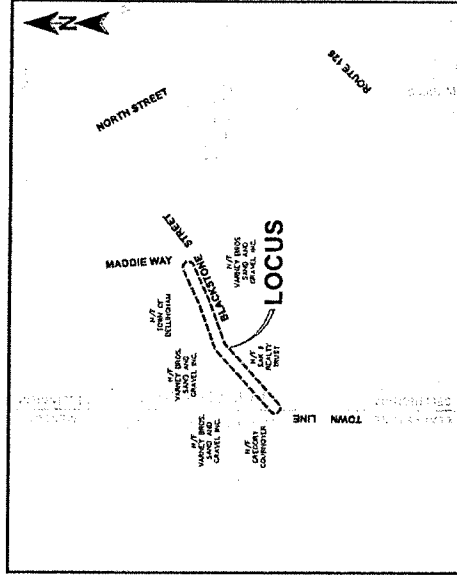

Jesse Leddick

**B. Determination**

Pursuant to the authority of M.G.L. c. 131, § 40, the Conservation Commission considered your Request for Determination of Applicability, with its supporting documentation, and made the following Determination.

Project Description (if applicable):

The applicant requests to determine the status of a stream, known as Quick Stream, shown on the USGS topographic map as a perennial stream on the above referenced properties. Based on the persistent, non-flowing conditions recorded during the month of September 2024 the applicant requests the stream be determined intermittent and therefore, not subject to the Riverfront Regulation.

**B. Determination (cont.)**

The following Determination(s) is/are applicable to the proposed site and/or project relative to the Wetlands Protection Act and regulations:

**Positive Determination**

Note: No work within the jurisdiction of the Wetlands Protection Act may proceed until a final Order of Conditions (issued following submittal of a Notice of Intent or Abbreviated Notice of Intent) has been received from the issuing authority (i.e., Conservation Commission or the Department of Environmental Protection).

- ☐ 1. The area described on the referenced plan(s) is an area subject to jurisdiction under the Act. Removing, filling, dredging, or altering of the area requires the filing of a Notice of Intent.
- ☒ 2a. The boundary delineations of the following resource areas described on the referenced plan(s) are confirmed as accurate. Therefore, the resource area boundaries confirmed in this Determination are binding as to all decisions rendered pursuant to the Wetlands Protection Act and its regulations regarding such boundaries for as long as this Determination is valid.

This determination confirms there is no Riverfront Area associated with the stream, known as Quick Stream, within the subject property. This determination makes no determination of down gradient sections of stream.

- ☒ 2b. The boundaries of Wetlands Resource Area(s) and Buffer Zone(s) listed below are not confirmed by this Determination, regardless of whether such boundaries are contained on the plans attached to this Determination or to the Request for Determination.

The resource area boundaries on site including Bank, Bordering Vegetated Wetlands (BVW), Land Subject to Flooding and their respective buffer zones are not confirmed by this determination.
